Bamdad Sabbagh

From Full Stack to Front End, the rise of SPAs leaned me towards specialising. I'm looking for mid-level positions where I can learn from skilled seniors and designers.

since 2018	Freelance — Front-End Developer Saint-Étienne, France I started my freelance adventure doing full-stack work and system administration for my existing customers. I now focus on front-end projects and use the JavaScript ecosystem daily.	Education Bachelor's Degree in Physics École des Mines de Saint-Étienne Licence de Mécanique IUT Mesures Physiques
2015 — 2018	Emkan Records — Label Owner Saint-Étienne, France I created this digital record label for promoting and distributing our repertoire. I also contributed as art director, mixing and mastering engineer, songwriter and DJ.	Skills Languages JavaScript (ES6 – ESNext) TypeScript Python 3 Front-end Frameworks React Vue 3 Next.js Vanilla State Management Zustand Jotai TanStack Query Testing Jest Testing Library Enzyme Build Tools Webpack ESBuild TypeScript CLI Babel GitHub Actions Data Visualisation Libraries D3 Three.js Soft Empathy Communication Creativity Collaboration
2012 — 2015	Renault Trucks — Product Owner & Business Developer Lyon, France I have gathered the chance to contribute to the network growth regarding key partners. I also helped our application to mature with new features, resulting in better engagement and feedback from our users.	
2011 — 2012	Acoem — Physics Engineer Lyon, France I did acoustics and vibration data analysis, industrial monitoring and maintenance. I also supervised technical training for our global partners and customers.	
2010 — 2011	Acoustic1 — Physics Engineer & Business Developer Wales, United Kingdom I spent a year abroad to complete my degree. I have worked on many topics with Steve Thomas, CEO of the UK brand. I contributed to new product launch, specification, validation, advertising and wrote a full-custom CMS in PHP.
